Aaqib Jeelani

Web Developer and Designer at Atom Cyber Technologies Dubai
UAE
United Arab Emirates

Summary

Tech Entrepreneur | Full-Stack Web Developer | Founder - Atom
Cyber Technologies

With a strong background in PHP, JavaScript, HTML, and CSS, I specialize in building high-performance web applications tailored to business needs. Over the years, I've developed and launched multiple software solutions, including ERP systems, snagging inspection apps, and custom web platforms.

As the founder of Atom Cyber Technologies, I lead a team focused on delivering cutting-edge software solutions, particularly in the snagging and inspection industry. Our flagship product, Atom Inspections, is streamlining property inspections across Dubai.

Key Skills:

Full-Stack Web Development (PHP, JavaScript, HTML, CSS)

WordPress & Custom CMS Development

Database Management (MySQL)

Web Application Optimization & Security

UI/UX Design (Dark-Themed, Sleek Interfaces)

Business & Startup Strategy

I'm passionate about leveraging technology to solve real-world problems, whether it's through enterprise software, SaaS products, or business automation tools. If you're looking to collaborate on innovative tech solutions, feel free to connect!

Experience

Atom Inspections

Web Developer

September 2024 - Present (1 year 2 months)

Dubai, United Arab Emirates

Software Developer & HR Coordinator

Atom Inspections | Dubai, UAE

At Atom Inspections, I play a dual role in both technology and operations. I developed and actively maintain the snagging inspection software that powers our inspection processes, ensuring it runs efficiently, securely, and remains optimized for business needs. Additionally, I contribute to HR management, streamlining workflows and supporting company operations.

Key Responsibilities:

Developed & manage the snagging software used for property inspections

Ensure continuous optimization, security, and performance of the system

Provide technical support & enhancements based on business needs

Occasionally manage HR tasks, contributing to company operations

I take pride in bridging technology and business operations, ensuring smooth digital transformation for Atom Inspections' snagging processes.

Atom Cyber Technologies

Project Delivery Specialist

October 2024 - Present (1 year 1 month)

Dubai, United Arab Emirates

Founder & Full-Stack Developer

Atom Cyber Technologies | Dubai, UAE

As the Founder and Lead Developer at Atom Cyber Technologies, I oversee the design, development, and deployment of custom web applications and business automation solutions. My role blends technical expertise with business strategy, ensuring our software solutions meet industry standards and client needs.

Key Responsibilities:

Developing and managing custom web applications, ERP systems, and SaaS solutions

Leading full-stack development with PHP, JavaScript, MySQL, and WordPress

Overseeing UI/UX design, ensuring sleek and intuitive interfaces

Implementing web security, performance optimization, and cloud-based solutions

Managing projects from concept to deployment, ensuring high-quality standards

Key Achievements:

Launched Atom Inspections, a snagging and inspection app streamlining property inspections in Dubai

Successfully developed and deployed multiple ERP solutions for businesses

Optimized and secured WordPress-based business websites, improving performance and SEO rankings

Expanded Atom Cyber Technologies into a leading provider of web-based business solutions

I'm passionate about building innovative and scalable software that helps businesses thrive in the digital space.
